

Service Profile

i3 works with its clients to identify barriers and obstacles, develop innovative solutions, and implement changes that drive value from the front-line to the bottom-line. Our innovative methodology allows us to quickly engage and effectively create impactful change.

Whether chemical manufacturing, generation, refining, transmission & distribution (electric or gas), propane, communications, or water, up-to-date and relevant processes and procedures need to be in place to provide the framework to operate effectively and efficiently. Focus on controlling each ring will assure the work processes established continually support the organization's strategic direction.

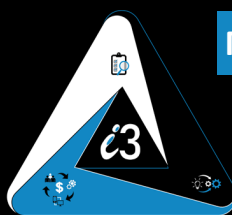

Successfully minimizing unplanned events through the proper execution of planned work ensures efficiency, safety, and predictability, all at optimal cost.
